

Our Mission:

Creating a Better Future One Patient at a Time

By applying the efficiency, versatility and specificity of antisense technology we provide personalized experimental antisense oligonucleotide (ASO) medicines to treat patients with nano-rare diseases (<30 patients worldwide) for free, for life.

Why n-Lorem?

Every Patient Deserves the Best

- We are set apart by the rigorous processes we use to identify and develop only optimal ASOs for our patients.
- We leverage a mutation-driven approach to target the unique genetic cause of disease.
- We bring knowledge, technological expertise, high quality systems, professional clinical management and a team of dedicated, compassionate professionals to provide only the best, most optimized medicine.

Nano-rare Patients

Nano-rare patients are only 1 to 30 patients worldwide with the same single gene mutation.

- Isolated and Desperate
- Limited Therapeutic Options
- Though Each Patient is Unique There May be Millions
- Non-profit Model is Needed

ASO Technology Makes n-Lorem Feasible

- Rapid and Efficient
- Versatile
- Validated and Well Understood
- Cost Effective
- Scalable
- Supported by Regulatory Authorities

Quality Systems Ensuring Optimal Therapies

- Maximize the **quality** of every step in the process of creating, administrating, and evaluating the performance of experimental ASOs in nano-rare patients
- Established a **rigorous** drug discovery process enables us to be successful in identifying the most optimal ASO for development
- Assure **professional management** of clinical exposures and regulatory processes
- Maximize **learnings** from each patient and the aggregate experience
- **Scale** to meet the need

We Are Treating Patients Today

>300

Applications to Treat Submitted

>140

Patient Programs Accepted

>20

INDs Filed in 4 Different FDA Divisions

For Life

Hope And Potential Help For a Better Future

Pathway to Treatment

At n-Lorem, our mission is to treat the patients we can today. This journey begins with a research physician submitting an 'application to treat' for their patient to n-Lorem.

Our Patients Need Your Support: Partner With Us

Join us on our *Corp of Discovery* of the mind and heart. Help us bring hope and potential help to nano-rare patients today.

For free, for life.
